Didn't get a confirmation email after signing up?

- Check your spam or junk folder
- Search your inbox for "ToneSmith"
- Wait up to 5 minutes — large inbox providers occasionally delay

Your downloads (plugin `.ccx`, license key, LPI test sheet, this guide zip) are always available 24/7 at tonesmith.makerfoundryco.com/account

2 Pick Your Workflow

ToneSmith works two ways. You can use one or both — same engine, same results, same subscription.

- **Web App** — browser-based. Fastest to start. No install.
- **Photoshop Plugin** — native panel inside Photoshop v23+ (Creative Cloud).

Open the matching guide in this folder:

- `Quick_Start_Guide_Web-App.pdf`
- `Quick_Start_Guide_Photoshop.pdf`

Each one walks you through your first separation. Pick the one that matches how you already work.

3 Get Your First Win

Drop in any DTF or DTG design. Set the shirt color. Click **Start ToneSmith**. Tweak the halftone, levels, and underbase live as you watch the preview update.

When it looks right, hit **Apply Separations** and **Export**. Done.

Your first clean separation is the moment everything clicks.
